- Committed to customer satisfaction
- Proven track-record

Supply, install, repair and maintain: The Complete Solution

Just a glimpse of what our clients are saying about us:

"BCAS have provided us with high quality vacuum installations, coupled with fantastic customer service"

"I was impressed by your engineer's level of expertise. He was able to advise on exactly which vacuum products we needed (and those we didn't) and how to get the most out of our existing plant"

"We find BCAS to be creative in problem resolution, reliable in time commitments and consistent in meeting our expectations"

"Always available with advice and solutions to problems in my industrial environment"

"We have used the services of BCAS a number of times and have found that they offer not only vast amounts of experience but are also an extremely professional company who bring excellence as standard"

"Thank you for the miraculously quick turnaround"

"Your guys always do a good, reliable job for us"

Vacuum and compressed air system design, supply and installation

BCAS has a wealth of experience as a specialist provider of vacuum and low pressure pumping solutions to the OEM, end-user and resale markets.

As Elmo Rietschle's distribution sales and service partner, we can deliver the best choice of products and technologies, outstanding quality and expert know-how for all applications requiring vacuum or pressure.

And meet our greatest asset: a dedicated team of engineers focussed on finding and delivering solutions that will make your processes faster, safer and more cost efficient.

Extensive services to meet all your vacuum and compressed air needs

In addition to the products of our premier partners, Elmo Rietschle, CompAir, Hydrovane and JUN-AIR/GAST, BCAS provides a comprehensive range of services and sales that includes:

- Elmo Rietschle vacuum pumps, blowers and spares
- Planned maintenance and reactive maintenance services with 24/7 breakdown cover
- Turnkey compressed air system design, supply, installation and commissioning
- Ancillary compressed air equipment:
 - Refrigerant dryers
 - Desiccant dryers
 - Air receivers
 - Filters and service kits
 - Oil/water separators
- Nitrogen generators
- Pipework installations and alterations (BCAS is an accredited Teseo sales and installation partner)
- Specialist process filtration products and advice
- Written Schemes of Examination – "WSE's"

Maintenance

Regular planned maintenance is essential to ensure that your vacuum system and ancillary equipment are kept in the very best working order.

As Elmo Rietschle's designated service partner, BCAS works hand-in-hand to deliver a planned maintenance programme, with **genuine** Elmo Rietschle spares and oil, to minimise downtime and prolong the working life of your vacuum systems and equipment.

Of course, we appreciate that things do occasionally go wrong, so we also provide a full 24-hour breakdown cover service, so that any unexpected business interruption is minimised.

All of our engineering team are factory-trained to Elmo Rietschle's own rigorous standards and undertake regular refreshers so that they are able to provide a current, solution-based approach to both maintenance and any breakdown challenges.

Professional certification and audit trail

We are fully Health and Safety accredited with Safe Contractor and EXOR, as well as being Constructionline approved and full members of the British Compressed Air Society.

As you would expect, we also hold full public liability insurance, so you have complete peace of mind that you are dealing with professionals

All maintenance visits, both planned and reactive, are fully documented so that you can fulfil and evidence your Health and Safety compliance and provide a full equipment audit trail to meet your own regulatory requirements.

We are also ideally placed to advise on relevant legislative matters such as Pressure Equipment Regulations and Pressure Systems Safety Regulations (PSSR 2000), Condensate Management and Written Schemes of Examination (WSE's).

About us

BCAS has over 25 years of specialist experience within the vacuum and compressed air industry. We are Elmo Rietschle's largest dedicated sales and service distributor in the South of England and primary UK sales and service partners for CompAir, Hydrovane and JUN-AIR/GAST.

From supply and installation to both planned and reactive maintenance, our team of experienced, factory-trained engineers provides tailored solutions to meet our customers' specific needs.

At BCAS, we pride ourselves on supplying and fitting only genuine original equipment manufacturers' spares and oil, to reduce the likelihood of downtime and to help ensure your warranty remains valid.

In addition to our primary brands, our engineering team is available to provide full maintenance support on all other manufacturers' systems.

The BCAS Head Office is based in Wallingford, South Oxfordshire and our engineering team provides full sales and service support to our client base throughout the South of England.

Part of the TFG Group

BCAS is a member of the TFG Group, which provides facilities maintenance and asset management to commercial and public sector clients throughout the UK.
