GAST JUN-AIR®

Compressed air system design, supply and installation

BCAS has a wealth of experience as a specialist provider of air motor, vacuum and low pressure pumping solutions to the wide range of industries.

As GAST JUN-AIR's sales and service partner for the whole of the south of England, BCAS can deliver the best choice of products and technologies, outstanding quality and expert know-how for all applications requiring vacuum or pressure.

We provide a comprehensive range of services and products to meet all your compressed air needs:

- Turnkey compressed air system design, supply, installation and commissioning
- Specialist process filtration products and advice
- Planned maintenance and reactive maintenance services with rapid response breakdown cover
- Ancillary compressed air equipment supply:
 - Refrigerant dryers
 - Desiccant dryers
 - Air receivers
 - Filters and service kits
 - Oil/water separators
- Nitrogen generators
- Vacuum pumps, blowers and spares
- Pipework installations and alterations (BCAS is an accredited Teseo sales and installation partner)
- OEM compressor spares and oil
- Breathing air testing and certification
- Written Schemes of Examination (WSE's)

Maintenance

Regular planned maintenance is essential to ensure that your compressed air plant and ancillary equipment is kept in the very best working order.

BCAS tailors and implements a comprehensive, planned maintenance programme for your system, using only genuine GAST JUN-AIR spares and oil, to minimise downtime and prolong the working life of your compressed air system.

Of course, we appreciate that things do occasionally go wrong, so we offer a rapid response breakdown service so that any unexpected business interruption is kept to a minimum.

All of our engineering team are factory-trained to rigorous GAST JUN-AIR standards and undertake regular refreshers so that they are able to provide a current, solution-based approach to any maintenance and breakdown challenges.

Professional certification and audit trail

We are fully Health and Safety accredited with Safe Contractor and EXOR, as well as being Constructionline approved, and full participatory members of the British Compressed Air Society.

As you would expect, we hold full public liability insurance, so you have complete peace of mind that you are dealing with professionals.

All maintenance visits, both planned and reactive, are fully documented so that you can fulfil and evidence your own Health and Safety compliance and provide a full equipment audit trail to enable you to meet any of your own regulatory requirements.

We are also ideally placed to advise on relevant legislative matters such as Pressure Equipment Regulations and Pressure Systems Safety Regulations (PSSR 2000), condensate management and Written Schemes of Examination (WSE's).

About us

BCAS has over 30 years of specialist industry experience, providing tailored solutions to our customers' specific compressed air needs.

We are GAST JUN-AIR's sole partner for the south, as well as being primary distributors for Compair and Elmo Rietschle.

We are committed to delivering outstanding customer service and technical advice, always striving to exceed our customers' expectations.

At BCAS, we pride ourselves on supplying and fitting only genuine, original manufacturers' spares and oil to reduce the likelihood of downtime and to ensure your warranty remains valid.

In addition to our primary brands, our engineering team are also available to provide full maintenance support on virtually all other manufacturers' systems.

Our Head Office is based in Wallingford, South Oxfordshire and we provide full sales and service support to our customer base throughout the South of England.

Part of the TFG Group

BCAS is a member of the TFG Group, which provides facilities maintenance and asset management to commercial and public sector clients throughout the UK.
